

**CLIENT:** Star Energy  
**LOCATION:** Welton, Lincolnshire  
**VALUE:** £120k  
**DURATION:** 18 months  
**PROJECT:** P&ID Review

Technica were employed to survey the existing process plant against the current Piping and Instrumentation drawings. Where differences are found these are reflected on the amended drawings produced as part of this work.

Untagged plant is identified and recorded on the site asset register.

- ✓ Identify existing drawings
- ✓ Site survey to establish accuracy of existing drawings
- ✓ Amend electronic copy to reflect as-built status
- ✓ Management of site tagging system
